

OptiCrop Agricultural Optimisation

The main purpose of the OptiCrop aims to develop an advanced software system.

OptiCrop Smart Agricultural Optimization Using ML

The project "OptiCrop: Smart Agricultural Production Optimization Engine" aims to develop an advanced software system that utilizes data-driven insights to optimize agricultural production for different crops. By integrating key environmental factors such as Nitrogen (N), Phosphorous (P), Potassium (K) levels, soil temperature, humidity, pH, rainfall, and crop types, OptiCrop seeks to provide intelligent recommendations to farmers for maximizing yields and resource efficiency.

Find Your Crop Recommendation

nitrogen:

nitrogen

phosphorous:

phosphorous

potassium:

potassium

temperature:

temperature

humidity:

humidity

ph:

ph

rainfall:

rainfall

Predict

The suggested crop for given climatic condition is: rice
